

A single 0–100 per raider, blended from five pillars. Built so nobody is forced to the bottom and every spec is judged by what it is *invited for*. *Performance is now input-based — what the player controls, not buff/tempo-inflated parse.*

THE COMPOSITE

Score = weighted blend of **Prep · Performance · Execution · Survival · Utility**, renormalized over the pillars that apply to that raider (a pillar that doesn't apply drops out — never a damaging zero).

WEIGHTS ARE SET PER SPEC — NOT ONE-SIZE-FITS-ALL (THE ARCHETYPE)

ARCHETYPE (BY SPEC / ROLE)	PREP	PERF	EXEC	SURV	UTIL
Pure DPS (lock, mage, rogue, fury...)	1.0	2.25	1.0	1.0	0.5
Utility DPS (ele, enh, survival, affli, shadow, ret...)	1.0	1.75	1.0	1.0	1.25
Utility-first DPS (boomkin — the buff-bot)	1.0	1.0	1.0	1.0	2.0
Healer	1.0	2.0	0.5	1.0	1.25
Tank	1.0	1.0	1.75	2.0	0.75

Role sets the base; a DPS spec's *utility tier* shifts weight between Performance and Utility — set by how much its utility *costs* output. So a boomkin is judged on the aura it brings, and a tank isn't judged on damage.

PILLAR — WHAT IT MEASURES	HOW IT'S SCORED	SCOPED AGAINST	SOURCE
Preparation Showed up raid-ready	Weighted checklist → 100, calibrated per archetype from T5 DPS-gain data: flask 40 (2 elixirs ≈ flask, 1 ≈ half), food, weapon oil/stone, in-fight pot. <i>Physical</i> weights the combat pot & weapon stone heavily; <i>casters</i> weight food more. Stat scroll +5 (bonus). Gear gaps deduct: −10 / enchant, −6 / socket.	ABSOLUTE Same fixed bar for everyone.	COMBATANT_INFO + combat log + gear audit
Performance What the player controls	DPS: activity / GCD-uptime % (boss + trash) is the backbone — buff/tempo-independent — blended with an overlay of on-CD cadence , DoT/self-buff uptime , and rotation share (your main nuke as a % of rotational casts). Parse % is context, not scored. Healers: HPS parse. Tanks: threat parse + survivability grade.	INPUT What you do, not what buffs/kill-speed inflate.	WCL casts/events + tables
Execution Avoided what was avoidable	Avoidable dmg/min vs cohort cap → 0–100; AoE-into-allies docks (friendly fire + MC), capped; killing a charmed ally → 0 . Tanks instead: active-mitigation upkeep (Holy Shield rate / Lacerate uptime).	COHORT Melee vs ranged separately. Melee-mandatory hits excluded.	combat log + WCL
Survival Stayed alive / used tools	Outcomes from 100: boss death −25 , trash death −12 , died with an unused healthstone −10 . Penalized once per category , not per death.	ABSOLUTE Once-per-category so a wipe night doesn't flatten everyone.	WCL deaths + combat log
Utility The job your spec brings	Signature facet(s) vs an absolute target → min(100, value/target). Your signature (ToW, Windfury, Innervate, mana battery, Sunder...) is your one job — a 0 counts. A spec brought <i>primarily for a debuff</i> is credited its uptime (affli → Curse of Elements, boomkin → Faerie Fire, survival → Expose Weakness). Assigned extras (dispels, battle-res, Expose Armor) are positive-only : lift, never drag.	CLASS-SHAPED Each class judged only on what it provides, vs a target — not the raid's best.	WCL casts/events + combat log

INPUT what you control

ABSOLUTE fixed bar

COHORT vs our raid, like-for-like

CLASS-SHAPED vs your kit's target

HOW IT STAYS HONEST — AND HOW IT'S CHECKED

- Input over output** — Performance grades activity + cadence + uptime (what you do), not buff/tempo-inflated parse.
- Null, not zero** — a pillar/facet that doesn't apply drops out and renormalizes.
- Per-spec weighting** — activity and a tank's mitigation aren't compared head-to-head.
- Unit-tested core** — the scoring logic is a fenced module run on every commit.

- Absolute targets, not a curve** — nobody is forced to last place each week.
- Positive-only extras** — assigned utility can only raise a score, never sink it.
- Scored once** — each ability lives in exactly one pillar (no double-count).
- v2 tuning** — every weight/target is labeled and calibrated against live weeks.

Reliable for "is this raider meeting their role's mandate?" and spotting outliers · v2 weights/targets are directional, not a precise cross-raider leaderboard.
